

Post-Doc  
FCT  
Spatially Resolved Electrochemical  
Techniques

We look for candidates for a post-doc fellowship on electrochemical techniques with spatial resolution, namely Scanning Electrochemical Microscopy (SECM) and Localized Electrochemical Microscopy (LEIS), applied to surface characterization and corrosion science.

Candidates need to have a doctorate degree in the areas of electrochemistry, corrosion or materials science. The aim is to apply for a fellowship near the FCT (Fundação para a Ciência e Tecnologia).

Deadline for application: September 15, 2008.

Potential candidates should send an email with the CV to:
